

# Quest in long-term pact with Nordam

OUR BUREAU  
Bangalore, 20 July

**Q**uest, a global product development solutions provider, has signed a long-term strategic relationship with the US-based Nordam Group. Quest engineers will support the Nordam Group's engineering departments with services to include design, CAD modelling, and stress analysis. Other opportunities may be considered in future.

Nordam designs, certifies and manufactures integrated propulsion systems and thrust reversers for business jets.

"We selected Quest as our partner of choice to provide engineering services, as they are a purely engineering focused solutions provider," said Steve Pack, VP and GM of thrust reverser systems of Nordam. "We are delighted to have been

selected by Nordam as their partner in global product development," said Ajit Prabhu, CEO of Quest.

A team of engineers are supporting activities for Nordam in their product range. "We had initially started the relationship with an onsite team at Tulsa, USA, and they have now transitioned to Quest's offshore location in Bangalore," he said. Both companies anticipate expanding the relationship based on business growth.
